Desired new text:

Contributions to the Chemical Engineering Excellence Fund give the department flexibility in advancing important initiatives and supporting students, staff, and faculty. This includes supporting outreach and professional development activities by student organizations, design competition teams, enabling students to present their work at conferences, and engaging the chemical engineering community. The excellence fund also supports the department's greatest needs, including emergency support for students, study abroad programs, internships, experiential learning opportunities, and academic programs. The excellence fund allows us to seize unexpected opportunities as they arise, allowing the flexibility necessary for our students and department to remain competitive while maximizing the potential of our ChE students.
